- ✚ Federal Inland Revenue Service (FIRS)

## OUR MISSION

Electricity, one of man's greatest benefactor in our industrial economy, like other forms of energy, must be treated and handled with utmost care. With great care and fore-thought, the use of proper safeguards and adherence to industry safe practices, work on electrical circuits and or equipment can be performed with safety both to the workman, and to his fellow workman, and ultimately to the consumers.

We understand this fact perfectly well. With our training, equipment and well-motivated team of experienced Engineers, technicians and artisans, we aim to deliver smiles, peace of mind and joy to our clients and we do so with strict adherence to an agreed delivery time and in line with professional codes of conduct and proficiency,

### AIMS & OBJECTIVE

The major aim of the company is to provide efficient and effective services at all times. It strives to achieve greater efficiency through improved services to its valued clients. Hence the company operates with such policies on manpower utilization and compliance procedure to fetch it the most desired result of being reckoned with, always satisfying client's interest above average standards

### COMPLIANCE PROCEDURES & GUIDELINES

It is the policy of the company for its employees to comply fully with the law at all times when conducting the company's business and also in their private lives. Hence our business is always conducted with high standard of professionalism, honesty and integrity.

The management has safety rules meant to be strictly adhered to by every employee taking into consideration the hazards on ground both at home, leisure and more importantly our workplace / project sites. The company also has it that no job is too urgent or important that it should be done without observing the applicable safety rules and standards. We do not at any time compromise on professional code of conduct.

### MANPOWER UTILIZATION

At Powerflow Installations Limited, we operate with the policy of optimizing manpower utilization with emphasis on professionalism, efficiency and delivery target, utilizing our experience, engineering and innovative expertise to deliver top quality jobs and services. The objective is to always have a highly productive workforce whose team work guarantees achieving our standards in specific operations and client's satisfaction on delivery.

We also have a support team of excellent qualified engineers, certified engineering shops and companies like:

-  Goodwill Engineering Power Company Ltd
-  Zencoll Global Services Ltd
-  Petoba Engineering Services Ltd
-  Dormax International Ltd

They have adequate experience, equipment and expertise that have over the years contributed immensely to our successes in project execution and delivery. They back us up in the following specific areas:

-  Advisory / consultancy
-  Transformer, materials sourcing and supply
-  Equipment / power tools leasing
-  Electrical Panel design, fabrication & maintenance

With our well-equipped and formidable staff strength (capable of matching any project size and working simultaneously in multiple projects), and support teams of the above listed companies, we promise to deliver / dispatch any job with competence, speed, and within a mutually agreed project schedule.
